Los Alamos National Laboratory Affirmative Action Program Calendar Year 2000

Summary

OVERVIEW

The Nondiscrimination, Equal Opportunity, and Affirmative Action policy statement for the Laboratory is expressed in the *Administrative Policies and Procedures Manual* (Section 100, Subject 101) and is restated below for the purpose of establishing the foundation of the Affirmative Action Program.

University of California Policy Authority

It is the policy of the University of California to undertake affirmative action, consistent with its obligations as a state and federal contractor, for underutilized minorities and women, for persons with disabilities, for Vietnam era veterans, special disabled veterans, and any other veterans who served on active duty during a war or in a campaign or expedition for which a campaign badge has been authorized, through formally written affirmative action plans. Prior to promulgation, affirmative action plans are reviewed by the General Counsel of the Regents to ensure compliance with applicable Federal and State Laws, executive orders, and regulations, and are approved by the President.

Nondiscrimination, Equal Opportunity, and Affirmative Action Policy Statement Laboratory policy requires a positive, concerted effort to ensure equal employment opportunity for all employees and qualified prospective employees. Consistent with the provisions of applicable State and Federal law, it is Laboratory policy not to discriminate against or harass any person employed by, or seeking employment with the Laboratory on the basis of race, color, national origin, religion, sex, physical or mental disability, medical condition (cancer related or genetic characteristics), ancestry, marital status, age, sexual orientation, citizenship, or status as a covered veteran (special disabled veteran, Vietnam era veteran or any other veteran who served on active duty during a war or in a campaign or expedition for which a campaign badge has been authorized). This policy applies to all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation.

The Laboratory also undertakes affirmative action consistent with its obligations as a federal contractor, for underutilized minorities and women, persons with disabilities, and covered veterans through formally written affirmative action plans. The Laboratory is committed to applying every good faith effort to achieve prompt and full utilization of minorities and women in all segments of its workforce where deficiencies exist. These efforts conform to all current legal and regulatory requirements and are consistent with Laboratory standards for quality and excellence. In conformance with federal regulations, the Laboratory prepares and maintains written affirmative action plans.

Affirmative Action is positive action in outreach efforts to recruit underrepresented minorities and women into the workforce. The purpose of these positive outreach efforts is to obtain diverse applicant pools to make good faith efforts toward meeting the Laboratory's affirmative action goals.

Both Laboratory employees and non-Laboratory applicants are considered to fill available positions. The objective of providing promotional and transfer opportunities to regular employees shall be considered. Occasionally, budgetary restraints necessitate suspension of external hiring in order to avoid involuntary reductions-in-force.

Nondiscrimination, Equal Opportunity, and Affirmative Action Policy Statement (cont.)

Individuals with Disabilities and Covered Veterans Policy Statement In cases where affirmative action goals have been set for women or minorities, the Laboratory will take affirmative action through targeted recruitment to increase the pool of qualified female and minority applicants. This affirmative action does not imply preferential treatment for these groups, nor is it a means for compromising job-related qualifications or standards for purposes of meeting numerical or percentage goals.

Laboratory policy is to seek and employ qualified personnel and to provide equal employment opportunity for all applicants and employees in recruiting, hiring, placement, training, compensation, insurance benefits, promotions, transfers and terminations. To achieve this, the Laboratory is dedicated to take affirmative action to employ and advance in employment qualified individuals with a disability and covered veterans. The Laboratory does not discriminate against any employee or any qualified applicant because he or she is an individual with a disability or a covered veteran. See the *Administrative Manual*, Section 100, Subject 118, or the Affirmative Action Program for Individuals with Disabilities and Covered Veterans (AAP Section 17) for further information.

The Laboratory makes reasonable accommodation for the physical and mental limitations of employees with disabilities and applicants with disabilities unless the accommodation would impose unreasonable hardships on the business operation of the Laboratory. Reasonable accommodation is considered on a case-by-case basis and involves consideration of productivity, safety, costs, and efficiency in the operation of the Laboratory.

Sexual Harassment Policy

Laboratory employees have the right to work in an environment that is free from unwelcome behavior or comments of a sexual nature. Sexual harassment is unacceptable conduct and is prohibited. The Laboratory takes measures to prevent acts of sexual harassment that affect a term, condition, or privilege of employment as described in the definition of sexual harassment. The Laboratory takes prompt corrective and/or disciplinary action for any act that violates this policy or the rights and privileges it was designed to protect.

Intimidating, coercing, threatening, discriminating, against, or taking reprisal against an employee for complaining about sexual harassment or for assisting with an investigation or complaint is prohibited.

Definition of Sexual Harassment

Unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of sexual nature constitute sexual harassment when

- Submission to such conduct is made explicitly or implicitly a term or condition of an individual's employment;
- Submission to or rejection of such conduct by an individual is used as the basis for employment decisions affecting such an individual;
- Such conduct has the purpose or effect of unreasonably interfering with an individual's work or performance; or
- Such conduct has the purpose or effect of creating an intimidating, hostile, or offensive working environment.

Nonretaliation Policy Statement

Employees and applicants are protected from coercion, intimidation, interference, discrimination, or retaliation for filing a complaint or for assisting in an investigation under all applicable laws and regulations governing the employment relationship.

Individuals who feel they have been discriminated against or retaliated against for filing a complaint may contact the following person at any time:

Mr. Michael A. Trujillo AA/EEO Officer P.O. Box 1663, MS C329 Los Alamos, NM 87545

Tele: (505) 667-8695 FAX: (505) 667-8720

E-mail address: mickt@lanl.gov

Employees may also contact Staff Relations (HR-8) at 505-667-8730 with complaints of discrimination, harassment or retaliation. Staff Relations has the overall goal of helping employees and supervisors resolve work-related concerns in an equitable, positive, and expeditious manner

RESPONSIBILITY FOR IMPLEMENTING POLICY

The Laboratory Director is responsible for Affirmative Action and Equal Employment Opportunity (AA/EEO) policy and programs/projects. The Director's reaffirmation of the Laboratory's commitment to AA/EEO principles, distributed annually by memorandum to all employees and included in the Affirmative Action Program Director's Policy Statement, clearly states that implementation of the AA/EEO policy is the responsibility of all employees.

Michael A. Trujillo has been designated as the Laboratory's AA/EEO Officer. The AA/EEO Officer is delegated the overall responsibility for affirmative action program administration, implementation, and monitoring.

Line managers and supervisors throughout the Laboratory are responsible for implementing the AAP within their organizations. This accountability extends to all elements of the AAP, including efforts to achieve affirmative action goals. Through the workforce and utilization analyses, management is advised of program effectiveness. Policy states that AA/EEO responsibilities are to be considered in the performance appraisals of line managers and supervisors.

All Los Alamos National Laboratory employees share responsibility for affirmative action by:

- fostering a work environment that is free from discrimination and supportive of
 employees regardless of their race, color, national origin, religion, sex, physical
 or mental disability, covered veteran status, medical condition (cancer related or
 genetic characteristics), ancestry, sexual orientation, marital status, age, or on the
 basis of citizenship within the limits imposed by Federal law;
- taking action to prevent sexual harassment or any harassing conduct by any employee or contractor who may create an intimidating, hostile, or offensive working environment; and
- utilizing the established complaint procedures as noted in the Administrative Manual (AM 111).

FY00 PLACEMENT GOALS

The following tables set forth the placement goals by EEO job group for women and minorities. The purpose of the Laboratory's establishment and use of goals is to insure that it meets its affirmative action obligation. It is not intended and should not be used to discriminate against any applicant or employee because of race, color, religion, sex, or national origin. These goals are expressed as annual placement goals equal to the availability percentages. The use of these goals is intended to have no significance outside the context of this AAP. The following factors affect the establishment and attainment of goals:

- · survey of present employment,
- · analysis of underutilization,
- anticipated turnover,
- · reduction of workforce caused by budget constraints,
- administrative controls on hiring and hiring-related activities caused by budget constraints,
- · changes in scientific programs and funding, and
- time necessary to acquire technical skills specific to Laboratory programs.

In those instances where underutilization exists, annual percentage placement goals are set to address disparities. These goals, timetables, and affirmative action commitments are designed to correct identifiable deficiencies. In all instances, goals are set for women and minorities equal to availability and are designed to reverse situations of underutilization of women and minorities. Underutilization is defined as having fewer women or minorities in a particular job group than would reasonably be expected by their availability.

The Laboratory's determination of underutilization does not amount to an admission of impermissible conduct. It is neither a finding of discrimination nor a finding of a lack of good faith affirmative action efforts. Rather, underutilization is a technical targeting term used exclusively by affirmative action planners who seek to apply good faith efforts to increase in the future the percentage utilization of minorities and women in the work force.

Underutilization
